- Re question of providing  
instructor at Offset;

Before I can decide on  
which course would be best one,  
I need to know more about how

25X1

would use a full-time  
instructor provided by us. I note  
that Industrial/Atomic Energy  
instruction is for only one week or  
less.

Can we ask

25X1

25X1

Assignment of NPIC Officer to Offutt AFB

PCS

Cost of travel of employee, family and shipment of effects (hypothetical family with 2 children) one way

GS-12-(3) annual salary

TDY (for one week period)\*

R/T air DC-Omaha-DC  
7 days per diem  
one week's car rental  
Taxi to/from home/airport  
4 classes a year (4 pad)

Salary (4 weeks )

If the assignment were made on a PCS basis, there appear to be a couple of ways to handle.

Establishment of a specific position (U.S. Field) -- This would mean either obtaining an additional slot or taking one from our existing ceiling.

Non-reimbursable detail -- In this case the individual would be carried in our Development, and would not encumber a specific position. He would, however, count against our total on-board strength and in order for  to fill the position vacated by the individual, we would of course have to be understrength elsewhere in the Center.

Ernie and I suggest that the "detail" basis might be the best approach initially. If it appears subsequently that our furnishing an instructor is a sound idea which will be continued for an indefinite period, then it would probably be prudent to establish a specific position.

→ \*The school instructional program indicates a period of less than one week devoted to Industrial/Atomic Energy instruction.
